

Managed Print Solutions

Whittaker Office Solutions have partnered with Brother Print Service for Health to help healthcare providers manage operational efficiencies.

What is Brother Print Service for Health (BPS)?

BPS for Health helps to reduce admin time when ordering your print supplies and is designed to keep your printer up and running. BPS for Health delivers:

- Fixed forecastable costs for supplies
- Introduces a streamlined ordering process
- Helps keep control of your print budget

Benefits of Brother Print Service for Health

- Set price per quarter based on your average print volume
- No restrictions or limits, we review the price annually to meet your consumption
- Most cost effective way to enjoy the benefits of Brother inks and toners
- Easy ordering process for the supplies you need, with next business day delivery
- Easy to request break fix service if required
- We will not check your existing Brother device, we just ask that they are in working order

How it works

BPS for Health is designed to be straightforward as possible. To get started, they would need a few details about your printers – it's a quick and simple process. Once they understand your needs, they can give you an accurate estimate of the volume of supplies you'll require. They will then develop a transparent, affordable 36-month service agreement, spreading the cost of your printer supplies into manageable, predictable chunks.

You'll have access to a simple-to-use online portal which lets you order new supplies as and when you need them.

Free next day delivery ensures you get your supplies quickly, so there's no need to spend money stocking up 'just in case'. If anything changes – like getting a new printer – just let them know and they can ensure everything is updated according to your needs.
